

# CA-HDCAB2

## High Speed HDMI® Cable with Ethernet

Cadyce High Speed HDMI® Cable CA-HDCAB2 allows you to transmit your HD video and multichannel audio from HD Source to your HD TV, Projector or LCD/LED screen.

Cadyce's HDMI® cables include an Ethernet-channel component that provides an internet connection for devices that are equipped to receive the internet through an HDMI® cable. Most of the devices today have HDMI® ports which also provide access to the internet, either through browsers or apps, so cables with Ethernet eliminate one more cord you need during the installation process. The Ethernet connection also provides an improvement over a wireless connection.

HDMI®

Multi-Channel Audio

3-Layer Shielding

- Experience full 3D HD movies and games at home
- 24K gold plated connectors for maximum signal transfer
- Supports up to 4K X 2K Cinema Resolution
- Faster data transmission up to 18Gbps
- EMI Shielding avoids outer interference
- HDMI 2.0 Specification
- Supports 3D Technology, Ethernet & Audio Return

The video capabilities of the HDMI® 2.0 interface have taken 3D rendering to a whole new level.

Enjoy your 3D movies and games using CA-HDCAB2.

Enjoy the video quality of a multiplex cinema from the comfort of your own home. Support for extremely high video resolutions (larger than 1080p), covers the resolution of 4096 X 2160 pixels.
